

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

perfect clearness. It is a first-rate example of a map generalized from topographic survey sheets and adapted for the needs not only of tourists and the general public but also of geologists and other scientific specialists.

GERMANY.—Die Polen im westlichen Preussen am 1 Dezember 1905. Scale, 1:2,750,000 or 43.4 miles to an inch. *Zeits. des K. Preuss. Statist. Landesamts*, No. 4, 1908. Five tints show density of Polish population.

THE OCEANS.

ATLANTIC OCEAN.—Campagne Scientifique de la "Princesse Alice," 4 Mai-Août, 1908. Itinéraire. Mercator Projection. *Bull. de L'Institut Océanographique*, Monaco, 1908. A black and white map accompanying a list of the scientific stations on this cruise with soundings in meters.

ATLASES.

Atlas Général Vidal-Lablache.—Histoire et Géographie. Nouvelle Édition. 420 maps and insets. Armand Colin, Paris, 1909. The new edition is being published in 26 parts, of which 7 have now been issued. One hundred and eleven maps and insets appear in the 6 parts just received. The large number of insets and the explanatory text by Prof. Vidal de la Blache, at the bottom of each page, enhance the value both of the historical and the modern sections of the atlas.

CURRENT GEOGRAPHICAL PAPERS.
